

Intro activities

Partner draw

What you need

Paper
Pencils
Clipboards
Viewfinder (a card frame–optional)

Time

5-10 minutes

The activity

Pairs of children stand back to back. The partner facing away from the view should have the drawing materials.

The partner facing the view describes what they see through the viewfinder (or by making a rectangular 'frame' with their thumbs and first fingers). The other partner draws what is described, asking questions at any time to help clarify.

Allow 2-3 minutes for this.

Once they have completed this, they can look together at the picture before swapping places and doing the activity again.

More able / older pupils

Extend the time or use a larger frame.

Less able / younger pupils

Ask children to choose one thing, perhaps a tree or the river/lake and describe that.
